

T-mobilitat reaches the urban bus services of Sabadell, Gelida and Sant Esteve Sesrovires and different interurban lines

- **The new system has begun to operate the twenty lines of Transports Urbans de Sabadell (TUS), the service of one of the most populous cities in Catalonia**
- **It has also incorporated the Hispano Llacunense (Hillsa) bus company, which runs different urban and interurban services such as the e18**
- **The deployment of T-mobilitat throughout the bus network of the 6 zones of the Barcelona ATM stands at over 90%**

Barcelona, 25th January.- This week **T-mobilitat** has taken a further step forward in terms of its gradual deployment in the Barcelona area by reaching the municipality of Sabadell, one of the last major cities in the province that was still to be integrated into T-mobilitat.

About twenty Transports Urbans de Sabadell (TUS) lines have been incorporated into the new validation system, in such a way that citizens of Sabadell will be able to travel on the urban buses and transfer to Rodalies, Ferrocarrils and other bus lines that have already been integrated with the new card or their mobile phones.

Integration of Hillsa lines

In addition, a new group of interurban lines running through the counties of L'Alt Penedès, El Baix Llobregat and L'Anoia has also been incorporated, as well as the urban services of Gelida and Sant Esteve Sesrovires.

These include the bus service operated by Hispano Llacunense or Hillsa, with different interurban lines, including the **Express.cat e18** network, and the **Gelida and Sant Esteve Sesrovires municipal bus service**.

More than 90% of the bus network now operates with T-mobilitat

With this week's additions and those of most of the lines run by Sagalés, the deployment of T-mobilitat throughout the bus network of the 6 zones of the Barcelona ATM stands **at over 90%**. The incorporation of bus operations that are not included, have different technologies or require *ad hoc* adaptations of the T-mobilitat system will take place in the coming weeks.

Currently, the new system **has over half a million validations** on weekdays and allows travel on the entire railway network of the Barcelona ATM, all Barcelona metropolitan area buses and practically all the interurban and urban bus services in zones 2, 3, 4, 5 and 6. You can visit the [T-mobilitat website to see how the system has expanded](#)

Ticket sales channels

In all zones, Barcelona ATM tickets in are sold through the official T-mobilitat sales channels:

- The TMB, Ferrocarrils, Rodalies and TRAM **self-service machines**.
- The [T-mobilitat](#), [TMB](#) and [FGC websites](#), in the case of purchasing the card.
- The [T-mobilitat](#) , [TMB App](#) and [FGC T-mobilitat applications](#).
- The [T-mobilitat support points set up in the public transport network](#).

We remind you that tickets for all the zones of the T-usual (also FM/FN) and the T-jove (also FM/FN) can be purchased with the corresponding rate reduction until 30th June 2023. Further information on the reduced rates and their conditions [on the Barcelona ATM website](#) .
